Question 1: Single Correct - 1.0 point

A cryptocurrency follows Bitcoin's original issuance rules. If 19.91 million coins are already in circulation and 781,564 blocks have been produced, what amount of new currency is currently created when a valid block is added?

- ☐ A. 12.528 units
- ☒ B. 6.250 units
- ☐ C. 12.345 units
- ☐ D. 1.862 units

Answer Key: B

Question 2: Single Correct - 1.0 point

What is the purpose of the nonce in a blockchain block?

- ☐ A. To store a value that helps verify transactions within the block.
- ☒ B. To provide a changing input used during hashing of the block header.
- ☐ C. To record the time at which the block is broadcast to the network.
- ☐ D. To uniquely label a block for identification by network nodes.

Answer Key: B

Question 3: Single Correct - 1.0 point

Which property of cryptographic hash functions most directly enables blockchain immutability?

- ☐ A. Deterministic output for identical inputs.
- ☐ B. Computational resistance to preimage attacks.
- ☒ C. Sensitivity of output to any input modification.
- ☐ D. Fixed-length output regardless of input size.

Answer Key: C

Question 4: Single Correct - 1.0 point

Can tampering be detected in the latest block while it is still being mined?

- ☐ A. Yes, because every data change immediately invalidates the block hash.
- ☒ B. No, because the block hash is not yet finalized during nonce computation.

☐ OC. Yes, because nodes continuously verify block contents during mining.

☐ OD. No, because hash linkage only applies after block confirmation.

Answer Key: B

Question 5: Single Correct - 1.0 point

What is Bitcoin halving?

☐ OA. A process where the total supply of Bitcoin is cut in half every four years to control inflation.

☒ B. A pre-programmed event in which the block reward given to miners is reduced by 50%, occurring approximately every 210,000 blocks.

☐ OC. A network upgrade that halves transaction fees to increase user adoption and scalability.

☐ OD. A consensus mechanism change that reduces mining difficulty by 50% to maintain block time.

Answer Key: B
